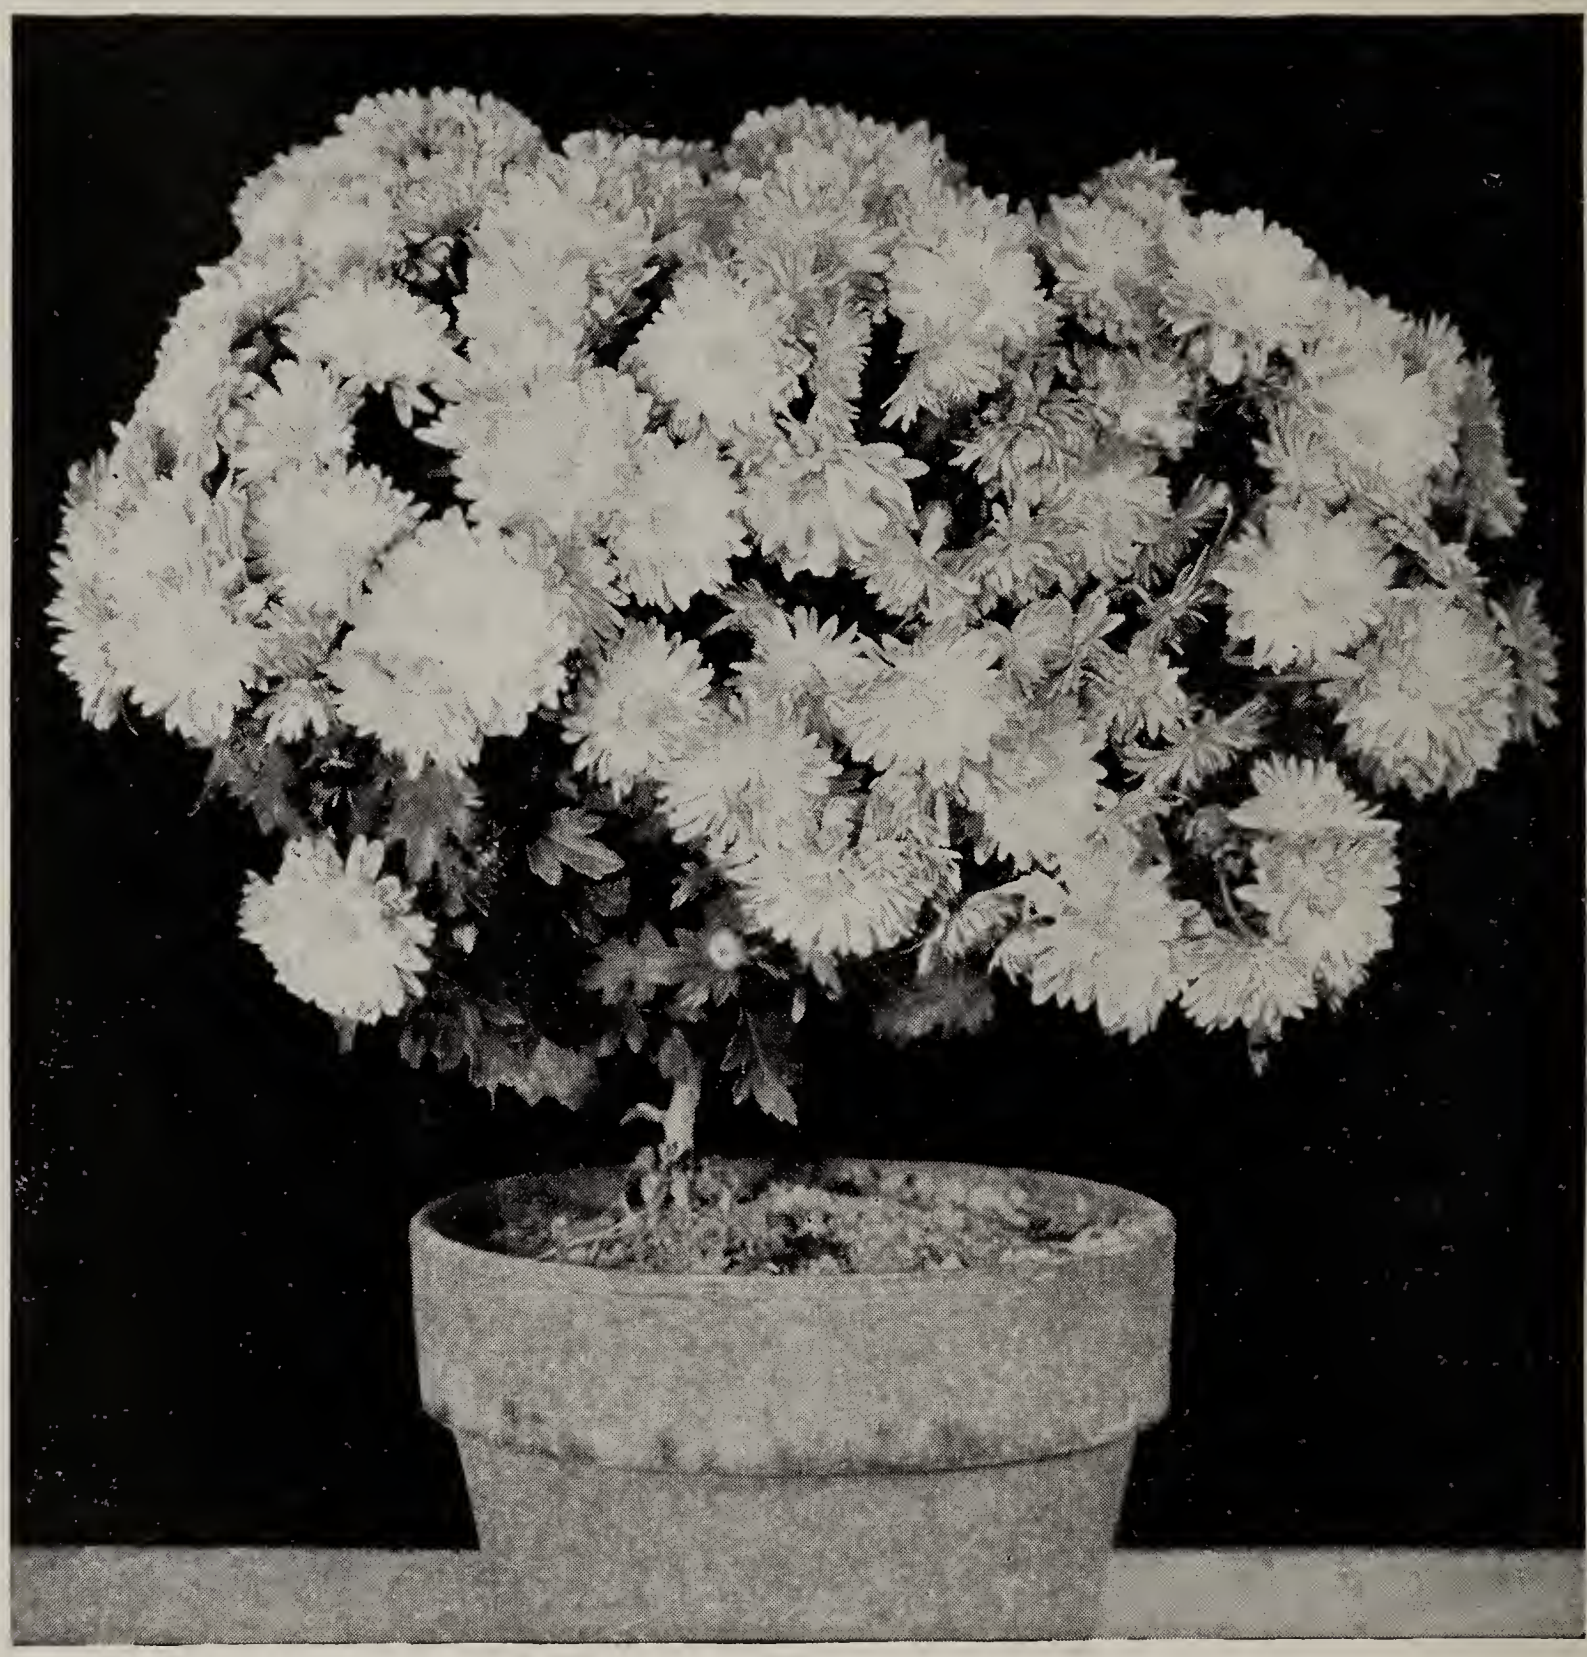
PINK CUSHION

The Azalea Flowered Chrysanthemum



AT THE 1933 and 1934 Century of Progress Exhibition in Chicago this beautiful new Chrysanthemum created sensational interest. The plant is dwarf and spreading in growth, very hardy, and far more prolific than any other variety. When well established, single plants of Pink Cushion have been known to have 1500 flowers open at one time. In color it is of a very pleasing rose pink. Pink Cushion produces its first flowers in late August and continues to be a mass of blazing glory until late frost. We consider Pink Cushion the finest outdoor Chrysanthemum; for the florist it makes an exceptionally fine pot plant. You will profit by offering Pink Cushion to your trade in 1936.

Rooted Cuttings, $4.00 per 100, $35.00 per 1000

Plants from 2 1-4 in. pots, $5.50 per 100, $50.00 per 1000

Bignonia Venusta (Flame Vine)

Without a doubt this vine attracts more attention in Florida than any other, even than the Bougainvilleas. In many sections of South Florida it covers huge pine trees, fences, buildings, and the like, and when in bloom in winter appears to be a mass of flames. The vine is exceptionally vigorous, reaching 80 feet or more, and clinging tightly to any support unaided after securing a little foot hold. The foliage is a good green and the orange-red, tubular flowers are borne in dense clusters and greatest profusion in winter and often times are followed by a lighter crop in May or June.

TEDDY JUNIOR (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—The most popular of present day ferns. A dwarf type of the popular Boston variety.

GOODI ("The Baby's Breath Fern")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

No plant lends itself to such general usefulness as the Geranium. For pot work and bedding it is unsurpassed. We carry at all times immense quantities of this indispensable florist's plant but have sold out early the past few seasons. Make your reservations early.

It is by far the most prolific of all double geraniums—it may be finished in four inch pots with an average of four to five large flower heads. In color, beautiful Enchantress pink. Stock is very limited. $1.50 per 12, $10.00 per 100.

IRVINGTON BEAUTY (New)—Since introducing this beautiful new Geranium in 1927, the demand has constantly exceeded the supply. It is one of the most prolific of all Geraniums, flowering earlier and later than all other varieties, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits.

BUDDLEIA—The Butterfly Bush

This is perhaps the most popular of our garden and hardy border shrubs, being almost continually in flower from July until frost. The plant grows to a height of about four feet and produces an abundance of flower spikes which are made up of myriads of miniature florets of beautiful shades of lilac. The flowers are very fragrant and attract butterflies in great numbers from which fact the shrub has gained its name.

Alternifolia (New)

This is the hardiest "Butterfly Bush" yet introduced. Only once in a lifetime do we find a new shrub of so outstanding merit as this. While other Buddleias freeze down to the ground every winter, and during the summer grow to a height of five or six feet, being too large for a perennial border and not suitable for among shrubs, this wonderful new Buddleia DOES NOT FREEZE DOWN in winter, but is just like other shrubs, filling a long-wanted place for Buddleias. It is a very distinct and charming sight while in bloom, with its long arching or pendulous branches covered with clusters of lilac-purple flowers from early to mid-summer. **$1.20 per 12; $8.00 per 100; $75.00 per 1000.**

Buddleia, The Butterfly Bush

Farquhari

A low-growing pendulous, spreading shrub, with rich green foliage and silver reverse, bearing in late summer, long racemes of purple flowers. **75c per 12; $5.00 per 100; $45.00 per 1000.**

Ile De France (New)

For brilliance of color, grace of its flower spikes, and uniform habit of growth, this new Buddleia greatly surpasses all other varieties in cultivation. The plants develop into well-branched, symmetrical bushes 3 to 4 feet high. The individual flower spikes measure 6 to 9 inches in length. They are brilliant rosy purple with a violet suffusion. Their fragrance adds another feature to their beauty. We offer strong thrifty plants that will produce an abundance of flowers this summer. **$1.20 per 12; $8.00 per 100; $75.00 per 1000.**

Variabilis Magnifica

This is really a shrub but the top usually freezes back, and new growth starts from the root like other perennials. Plants grow three to four feet and are covered with long racemes of lilac-like flowers all summer. **75c per 12; $5.00 per 100; $45.00 per 1000.**

Veitchiana

Beautiful violet mauve; a splendid Summer flowering shrub, absolutely hardy under any conditions; flowers are borne on long cylindrical spikes; 12 to 15 inches in length. **75c per 12; $5.00 per 100; $45.00 per 1000.**

Variabilis Wilsoni

The latest of all the summer lilacs to flower, blooming in September. It bears immense, tail-like spikes sometimes 30 inches long, of bright rosy lilac flowers with orange eye. **75c per 12; $5.00 per 100; $45.00 per 1000.**

Lavender Glory (New)

A new variety that is distinctly beautiful. The flowers are abundantly produced in graceful sprays during the Summer months. In color, rosy lilac. Stock is very scarce. **$1.20 per 12; $8.00 per 100.**

TRITOMA TOWERS OF GOLD

THE GOLDEN POKER PLANT

TOWERS OF GOLD is undoubtedly the finest Tritoma produced since Pfitzeri. Its magnificent golden yellow flowers are produced more profusely and earlier than any of the cut flower types. The flowers are larger than those of Pfitzeri and the plant is stronger and more robust in habit. Towers of Gold is particularly fine for growing for cutting during the Summer months.

$2.00 per 12, $15.00 per 100.
